PROFESSIONAL SUMMARY

Computer Engineering graduate and software engineer specializing in full-stack web development, backend infrastructure, technical writing, and networking. Proven expertise in building scalable web applications using Python, Flask, React, Node.js, and SQLite, alongside strong cross-functional experience in customer service, digital marketing operations, and IT infrastructure setups.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, C++, HTML5, CSS, Object-Oriented Languages
- **Frameworks & Libraries:** Flask, React.js, Node.js, Vite
- **Databases:** SQLite, MySQL
- **Tools & Version Control:** Git, GitHub, npm
- **Networking & IT Infrastructure:** IPv4 Addresses, Wireless Access, Protocol Standards, Application Layer Services, Network Types (Cisco), Domain Configuration, Microsoft 365 Business Email Setup
- **Professional Competencies:** Technical Writing, Web Content Writing, Digital Marketing & Social Media Management, Customer Service

LANGUAGES

- **English:** Native
- **Shona:** Native
- **German:** Medium
- **Turkish:** Medium

PROFESSIONAL EXPERIENCE & WORK HISTORY

Freelance Computer & Software Engineer & Tech Content Writer — *Norton & Harare, Zimbabwe* | *Present*

- Design, develop, and deploy custom full-stack web applications for clients, integrating Python/Flask or Node.js backends with modern frontend frameworks.
- Produce clear technical documentation, articles, and specialized web content.
- Manage end-to-end technical setups for businesses, including domain configuration (upgradetrans.co.zw), official email infrastructure, and digital tool integration.
- Utilize Git and GitHub for source code management, version control, and collaborative repository workflows.

Digital Marketing & Social Media Management — *Part-Time / Freelance*

- Managed business Instagram accounts and handled digital engagement campaigns.
- Assisted with AI-driven advertising strategies and customer communication setups.

Beauty & Aesthetic Services Specialist — *Part-Time / Independent*

- Provided professional nail styling services focusing on polygel applications, builder gel bases, and custom press-on nail sets.

- Operated local service offerings with structured pricing models and promotional media.

Restaurant Crew Member / Service Staff (Part-Time during University Studies - Northern Cyprus)

- Swan of Soli | June 2026 – August 31, 2026: Delivered efficient guest services, managed floor operations, and maintained cleanliness in alignment with hospitality safety standards.
- Koko City | February 2024 – June 2026: Handled customer orders, coordinated front-of-house and kitchen communications, and ensured prompt service delivery in a high-volume environment.
- Agave Restaurant | May 2023 – February 2024: Provided professional customer service, supported daily restaurant operations, and assisted with service area organization.

KEY PROJECTS

Virtual Stylist Fashion 'Complete the look' — *Web-Based Computer Vision & AI Application (Associated with European University of Lefke / EUL)*

- Developed a web-based project utilizing computer vision techniques and AI-driven detection to recommend visually compatible fashion items and complementary pieces.
- Enabled users to select base items, visualize complete outfits using a Bitmoji-style avatar, and manage a personal digital wardrobe by uploading custom clothing items.

Job Recommendation App — *Full-Stack Platform (Sep 2025 – Present)*

- Developed a platform designed to connect job seekers with relevant employment opportunities.
- Implemented database-driven functionality for storing, managing, and matching user profiles with job information.
- Designed a user-focused interface for searching and accessing employment data using Python and JavaScript.

Movie Web-Based Application — *Web Application (Associated with European University of Lefke / EUL)*

- Developed a responsive web-based application designed to provide movie recommendations.
- Built the frontend interface and integrated data logic to handle user preferences and filter movie databases efficiently using JavaScript and C++.

Luxe Thread Co. (luxe-thread-co) — *Full-Stack E-Commerce Catalog & Web Application*

- Engineered a modern, responsive web application featuring a robust backend and a dynamic React.js/Vite frontend with SQLite database storage.

CERTIFICATIONS

- **Networking Basics —** Cisco Networking Academy (Issued Sep 2026, Credential ID: a7743e61-6119-451e-ae6d-6908871c8aa0)

EDUCATION

- **Bachelor of Science in Computer Engineering —** European University of Lefke (EUL), Northern Cyprus
- **Advanced Level (A-Level) —** Tynwald High School
- **Ordinary Level (O-Level) —** Msengezi High School
